## UNEMPLOYMENT INSURANCE

### OPPORTUNITY REPORT

Prepared by the American Institute for Full Employment • January 2010

States have the opportunity to save millions of dollars and promote the overall well-being of their unemployed workers by implementing best practices in their Unemployment Insurance (UI) programs. UI is an often overlooked, yet critical program for employers and employees. UI policy decisions involve not only significant expenditures in the economy, affecting the business climate and economic development, but also the financial, mental, and physical well-being of the unemployed. In designing their UI programs, federal law allows states substantial flexibility that is too rarely used. This report surveys the Best Ten states' performance and highlights common areas for evaluation for all states. Rankings and individual state analyses can be found at [www.fullemployment.org](http://www.fullemployment.org). For a more detailed policy or program review, please contact the American Institute for Full Employment at (303) 681-1351.

8	Michigan	24.7%
9	Tennessee	25.3%
10	Virginia	25.4%
Best 10 Average		18.9%
United States Average		31.0%

\* Socialized Costs - The percentage of benefit costs not charged to responsible employers, but instead socialized as:

1) Noncharges - the total amount of benefit payments not charged to individual employer experience rating accounts. They often shift to the UI tax system social program costs; such as payments to workers who voluntarily quit and

2) Ineffective Charges - the yearly amount of benefit charges assigned to individual employers that exceed the amount of contributions paid by those same employers in the following year. These charges tend to lessen some employers' responsibility to pay the full cost of their claims, due to e.g. a maximum tax rate that is too low or an otherwise less responsive tax structure.

The levels of both noncharges and ineffective charges are largely within the control of state policy makers and affect the state's unemployment rates by raising or lowering: 1) the cost of employing a worker and 2) the cost of laying off a worker.
